***Please call 656-3443 for questions regarding the artwork for the ad. The term "camera ready" means that what you submit is how it will appear in the program. Thus, a poor quality color print out that is the wrong size will not look very good when reproduced in a black and white booklet. Please bear this in mind when talking to your potential advertisers. We want them to be happy with their ad so please encourage them to pay the set up fee if their ad has not been professionally produced. Also, Microsoft Word, Excel, Publisher, etc. files will **NOT** translate properly and will require a set up fee. **Print-ready .pdf, .eps, or .tif (at the correct size and resolution) files are acceptable. Clean, black and white, properly sized hard copy (not folded, stapled etc.) is acceptable.*****
